

## Thinking for a better world

### Economics, Finance, Policy—Senior Analysts

Do you want to apply cutting-edge economics, finance, and policy skills to the big problems facing New Zealand and the world? Can you marshal evidence and logic to answer questions like:

- What should governments do about climate change?
- How can we ensure energy security?
- When should competitors be allowed to merge?
- How can public-private partnerships help rebuild our infrastructure?

Can you communicate the answers in clear, compelling language? Do you like to work hard, pushing yourself to achieve excellence? Can you manage client-facing advisory projects, or would you like to learn how? Do you have relevant or transferable experience, great grades in a relevant degree, integrity, confidence, and a passion for teamwork?

If so, Castalia wants you as a Senior Analyst in our Wellington-based team (there is an option to move to Auckland once well-established in the role). Working on international and New Zealand-based projects with colleagues in our Sydney, Washington, Paris, and Bogotá offices, you can be part of a high-performing multi-disciplinary group solving genuinely important problems. Our clients include development agencies like the World Bank, major infrastructure investors, Government policy makers and regulators.

Pay is competitive with the market and depends on your own skills and experience.

**We're looking to hire professionals with 1-5 years' experience and a degree in Economics, Finance, Law, Public Policy, Operations Research or Engineering. Financial modelling experience will be an advantage.**

**To apply**, please send the following documents to [wellington@castalia-advisors.com](mailto:wellington@castalia-advisors.com):

- One-page cover letter stating why you want to work at Castalia, why you think you would be a valuable addition to our team, and an indication of your salary expectations
- CV.
